

i3's Smart Video Solutions

Protect, Monitor and Report.

i3 brings intelligent solutions for Specialty Retail to reduce liabilities and increase customer experience while keeping your business safe, secure, and thriving!

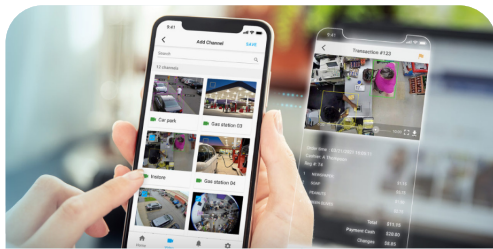

Enhance your security system with Ai

i3's patented AI technology seamlessly integrates with your existing system, elevating safety and security through features such as exit blocking, loitering detection, and camera obstruction alerts. Moreover, this technology enhances POS exception-based software tools, contributing to improved store operations and heightened overall efficiency

Exception based reporting

i3Ai enables you to monitor each transaction efficiently and swiftly sort and search through your data. This combined data, along with your video footage, enables thorough review of incidents and issues at your location. By leveraging this comprehensive approach, businesses can reduce shrinkage and minimize the resources needed to identify fraud effectively.

Business intelligence tools

By integrating your existing video with i3 Ai and data analytics software, i3 delivers detailed reports empowering your organization to make informed, proactive decisions about your operations.

Platform ease of use

Utilize i3's distinctive AI solution to improve customer service, support employees, enhance overall experiences, and optimize customer interactions through real-time alerting.

Encrypted video transfer

Connect securely to i3's cloud platform remotely via outbound ports, ensuring safe and effortless access to sensitive data. This feature facilitates seamless transfers of large video files to third-party insurers, streamlining the process for your RISK DEPARTMENT.

These services are available via our award winning **Ai-Cloud**, leveraging the power of cost effective offsite servers to get full access to **i3Ai**
