# i3 INTERNATIONAL™

# i3's Smart Video Solutions

Use video analytics & machine learning to enhance security & safety of your students and staff.

## Administration Control

i3Ai enables decision-makers to take a proactive approach to safety situations, fostering enhanced communication among students, teachers, parents, and administrators. Administrators maintain complete control over all users within the system, ensuring a secure and responsive environment.

## Real-time alerts

Empower your associates with i3's Ai and machine learning capabilities, enabling them to detect and respond to suspicious events at your location in real time. Interactive monitoring is now accessible for all organizations, regardless of size or budget, enhancing security measures effectively.

## Platform Ease of Use

Leverage i3's distinctive AI solution to enhance customer service, support employees, elevate the overall experience, and optimize customer interactions through real-time alerting.

## Extended cloud storage

With i3's cloud storage, users can securely store years' worth of video footage or share a day's recordings through the cloud. This ensures that critical video data is protected and secure in a remote facility, providing peace of mind and accessibility.

## Use i3Ai to ensure privacy while enhancing security

i3's SOS feature enables quick and secure video sharing with a single click during emergencies, eliminating the need for time-consuming third-party software for face and sensitive information blurring. With i3's Video Editor, tasks that used to take days are now completed within minutes. i3 prioritizes privacy for your students, staff, and guests, ensuring their safety and confidentiality at all times.
