

INTELLIGENT VIDEO DRIVING PROFIT

i3's Smart Video Solutions

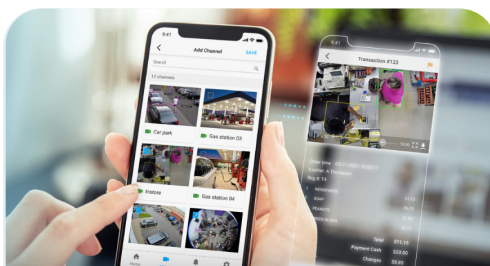

Protect, Monitor and Report.

Discover i3 International's AI-enhanced video solutions, designed to revolutionize your business' security. Our cutting edge technology provides unparalleled protection, detecting and preventing unauthorized access with precision and speed. Experience the peace of mind you deserve, knowing that i3 safeguards your business 24/7.

Turn-key solution & Integrated Platform

Seamlessly integrate third-party devices, including card access, alarms, and other building technologies. This integration reduces complexity, ensures uptime, and enhances the organization's ability to react swiftly, averting potential risks effectively.

Ease of Use / Redundancy

Leverage i3's innovative Ai solution to enhance customer service, support employees, elevate the overall experience, and optimize customer interactions through real-time alerting.

Secure Video Access

Connect securely and remotely to i3's cloud platform using outbound ports, fulfilling our mission to ensure secure and easy access to this sensitive data.

Real-time alerts

Detect and respond to suspicious events at your location in real time. Interactive monitoring is now accessible for all organizations, regardless of size or budget, making advanced security solutions affordable for everyone.

POS integration solution

i3's data analytics enables you to monitor every transaction, swiftly sort and search through data. Real-time alerts for fraud or suspicious behavior significantly reduce shrink and minimize the resources needed for fraud detection.

Extended cloud storage

With i3's cloud storage, users can securely store years' worth of video or share a day's worth of footage through the cloud, ensuring that the most critical video data is protected and secure in a remote facility.

These services are available via our award winning **Ai-Cloud**, leveraging the power of cost effective offsite servers to get full access to **i3Ai**
