

i3's Smart Video Solutions

Use **video analytics & machine learning** to enhance security & safety of your staff.

Platform Ease of Use

Utilize i3's innovative AI solution to enhance customer service, support employees, optimize overall experiences, and create real-time alerts that enhance the customer experience.

Real-time alerts

With the power of Ai and machine learning, i3 equips your associates to swiftly detect and respond to suspicious events at your location in real time. Interactive monitoring is now accessible to organizations of all sizes and budgets, ensuring enhanced security measures.

Secure Cloud Connection

Connect securely to i3's cloud platform remotely using outbound ports, ensuring both secure and easy access to this sensitive data.

Extended cloud storage

With i3's cloud storage, users can securely store years' worth of video or share a day's worth of footage through the cloud, ensuring the critical video data is protected and secure in a remote facility.

Ai enabled privacy & security

i3's video streaming solution enables secure viewing of live and recorded video through a designated outbound gateway. Accessible via any web browser or mobile device, it offers convenient and protected access to your video content.

Administrative Control

Be proactive rather than reactive to safety situations, enhancing communication among students, teachers, parents, and administrators. Administrators maintain complete control over all users in the system, ensuring a secure and responsive environment.

These services are available via our award winning **Ai-cloud**, leveraging the power of cost-effective offsite servers to get full access to **i3Ai**.
